

New Beginnings: From First Steps to Scientific Success

The school campus vibrated with energy as it welcomed its newest Nursery learners, marking the start of their academic journey. Teachers greeted families at the gate with traditional vermilion tilak, while Principal Shri Balram Kumar Jha escorted parents to the hawan area for a floral reception.

Addressing the gathering, Principal Shri Jha delivered a poignant reminder of the school's mission. "We do not aim to only produce doctors and engineers," he remarked, "but to cultivate the moral values necessary to combat the dwindling ethics in modern society."

The event also celebrated high-level achievement through the Inspire

Award programme. Two brilliant students -Aashit-X and Shanvi-VII were felicitated and granted stipends for their successful, approved scientific experiments. By blending

the warm welcome of toddlers with the recognition of young scientists, the day perfectly illustrated the school's dedication to nurturing both character and intellect from the very first day.
